The Growth of Single Crystals Charles S. Sahagian 1966 Single crystals of over 100 different electronically active materials have been synthesized using a variety of methods, including growth by flame-fusion, flux, melt, gel diffusion, low-temperature solution, vapor, as well as synthesis by ultra-high-pressure techniques. These crystals, including a large number of doped specimens, emphasize oxides, garnets, silicates, ferrites, fluorides, as well as a large variety of other electromagnetic materials. Charts are presented giving summary data on single crystals grown, percentage and kind of dopants, growth methods and apparatus, crystal dimensions and other physical characteristics, primary research interest or use, crystal system, class, space

group, and pertinent references. Several of the growth methods and recent Laboratory accomplishments are described. (Author).

Measuring the Impact of Climate Change on Indian Agriculture Ariel Dinar 1998-01-01 Using the Ricardian approach (a cross sectional analysis of farm performance across different climate zones), this report examines the impact of climate change on the agriculture sector and the sector's adaptation to that change. Studies in the report measure the climate sensitivity of low-capital agriculture, test whether actual farm performance is as sensitive to climate as

agronomic models predict, and compare the climate sensitivity of low-capital farms with the results already calibrated for U.S. agriculture. The goal of the study is to examine farm behavior and test whether there is any evidence that farmers in developing countries currently adjust to their local climates.

Karduniaš. Babylonia under the Kassites 1 Alexa Bartelmus 2017-06-26 Karduniaš, as the kingdom of the Kassites in Babylonia was called in ancient times, was the neighbor and rival of great powers such as Egypt, the Hittites, and Assyria. But while our knowledge of the latter kingdoms has made huge progress in the last decades, the Kassites have until recently been largely ignored by modern scholarship. Recently a number of scholars have embarked on research into different aspects of Late Bronze Age Babylonia. The desire to share the results of these new investigations resulted in an international conference, which was held at Munich University in July 2011.

The presentations given at this meeting have been revised for publication in the current volume. This book gives an overview of current research on the Kassites and is the first larger survey of their culture ever. An invaluable introduction by Kassite expert Professor John A. Brinkman is followed by seventeen specialist contributions investigating different aspects of the Kassites. These include detailed historical, social, cultural, archaeological, and art historical studies concerning the Kassites from their first arrival in Mesopotamia, during the period when a Kassite Dynasty ruled Babylonia (c. 1595-1155 BC), and in the subsequent aftermath. Concentrating on southern Mesopotamia the contributions also discuss Kassite relations and presence in neighboring regions. The book is completed by a substantial bibliography and a detailed index.

Coping with Demographic Change: A Comparative View on Education and Local Government in Germany and Poland Reinhold Sackmann 2014-11-12 With many OECD countries experiencing a decline in their populations, this book offers a theoretical model of coping with demographic change and examines different strategies that societies have used to come to terms with demographic change. In particular, it details the different ways that Germany and Poland have tried to cope with this challenge and reveals three conflicting strategies: expansion, reduction, and phasing out. Coverage includes: · How and why demographic change was used in Poland to expand the education system · The variance of linkage between demographic change and growth rates in different fields of education in a German Bundesland · Modes of reflexivity and personnel policy in German and Polish municipalities · Effects of demographic change and forms of coping on fiscal capacity and unemployment rates in German municipalities Coping with Demographic Change examines how and why societies cope with these detrimental effects. It conceptualizes the challenges a society faces as a result of demographic change and focuses on the processes by which actors,

organizations and nation-states try to cope with this new situation.

Steel Design William T. Segui 2012-08-01 STEEL DESIGN covers the fundamentals of structural steel design with an emphasis on the design of

members and their connections, rather than the integrated design of buildings. The book is designed so that instructors can easily teach LRFD, ASD, or both, time-permitting. The application of fundamental principles is encouraged for design procedures as well as for practical design, but a theoretical approach is also provided to enhance student development. Porosity in Titanium Welds Robert Melvin Evans 1964 Porosity in fusion welds in titanium has been encountered to some extent in all programs using this joining method. While measures to control cleanliness and to employ

good welding techniques have successfully reduced the occurrence of porosity, specific identification of the various causes of porosity is still lacking. Some factors suspected of causing porosity in titanium welds are hydrogen, cleanliness of joint area, contamination in filler wire, and welding procedures and techniques.

God and Mammon Mark A. Noll 2001-11-29 This collection of all new essays by leading historians offers a close look at the connections between American Protestants and money in the Antebellum period. During the first decades of the new American nation, money was everywhere on the minds of church leaders and many of their followers. Economic questions figured regularly in preaching and pamphleteering, and they contributed greatly to perceptions of morality both public and private. In fact, money was always a religious question. For this reason, argue the authors of these essays, it is impossible to understand broader cultural developments of the period--including political developments--without considering religion and economics together. In *God and Mammon*, several essays examine the ways in which the churches raised money after the end of establishment put a stop to state funding, such as the collection of pew rents, lotteries, and free-will offerings, which only came later and at first were used only for benevolent purposes. Other essays look at the role of money and markets in the rise of Christian voluntary societies. Still others examine the inter-denominational strife, documenting frequent accusations that theological error led to the misuse of money and the arrogance of wealth. Taken together, the essays provide essential background to an issue that continues to loom large and generate controversy in the Protestant community in America.

Dyadic Coping: A Collection of Recent Studies Guy Bodenmann 2019-09-25 Dyadic coping is a concept that has reached increased attention in psychological science within the last 20 years. Dyadic coping conceptualizes the way couples cope with stress together in sharing appraisals of demands, planning together how to deal with the stressors and engage in supportive or joint dyadic coping. Among the different theories of dyadic coping, the Systemic Transactional Model (STM; Bodenmann, 1995, 1997, 2005) has been applied to many studies on couples' coping with stress. While a recent meta-analysis shows that dyadic coping is a robust and consistent predictor of relationship satisfaction and couple's functioning in community samples, some studies also reveal the significance of dyadic coping in dealing with psychological disorders (e.g., depression, anxiety) or severe illness (e.g., cancer, diabetes, COPD, etc.). Researchers all over the world build their research on

this or other concepts of dyadic coping and many typically use the Dyadic Coping Inventory (DCI) for assessing dyadic coping. So far, research on dyadic coping has been systematically presented in two books, one written by Revenson, Kayser, & Bodenmann in 2005, focussing on emerging perspectives on couples' coping, the other by Falconier, Randall, & Bodenmann more recently in 2016, addressing intercultural aspects of dyadic coping in African, American, Asian and European couples. This eBook gives an insight into recent dyadic coping research in different areas and countries.
