Managing Conflict in Organizations M. Afzalur Rahim
2017-07-12 After much debate by business professionals, organizational conflict is now considered normal and legitimate; it may even be a positive indicator of effective organizational management. Within certain limits, conflict can be essential to productivity. This book contributes to the investigation of organizational conflict by analyzing its origins, forms, benefits, and consequences. Conflict has benefits: it may lead to solutions to problems, creativity, and innovation. In contrast, little or

no conflict in organizations may lead to stagnation, poor decisions, and ineffectiveness. *Managing Conflict in Organizations* is a vigorous analysis of the rational application of conflict theory in organizations. Conflict is inevitable among humans. It is a natural outcome of human interaction that begins when two or more social entities engage one another while striving to attain their own objectives. Relationships among people or organizations become incompatible or inconsistent when two or more of them desire a similar resource that is in short supply; when they do not share behavioral preferences regarding their joint action; or when they have different attitudes, values, beliefs, and skills. This book examines these root causes of organizational conflict and offers constructive perspectives on its consequences.

Women and Human Development Martha C. Nussbaum 2000-03-13 In this major book Martha Nussbaum, one of the most innovative and influential philosophical voices of our time, proposes a kind of feminism that is genuinely international, argues for an ethical underpinning to all thought about development planning and public policy, and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women.

Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice, and that feminist thought must begin to focus on the problems of women in the third world. Taking as her point of departure the predicament of poor women in India, she shows how philosophy should undergird basic constitutional principles that should be respected and implemented by all governments, and used as a comparative measure of quality of life across nations.

The Ethics of Cultural Competence in Higher Education Beverly A. Burnell 2015-02-11 This new book presents both research (qualitative, quantitative, and mixed-design) and conceptual chapters about the ethical factors to be considered in teaching, administration, and professional practice in

higher education settings. The book includes recent research-based ideas in the field of higher education. Topics include cultural competencies for higher education faculty, professionals, and administrators, such as use of language in communicating concepts to students for whom English is not a first language, avoiding imposition of bias, encouraging exposition of perspective, and ethical practices for professionals working with the diverse environments and populations in higher education settings. This work is particularly important since becoming informed on the latest approaches and ideologies is an essential component of both professional preparation and continuing professional development of faculty, professionals, and administrators in higher education. Currently, education practitioners struggle with finding time for professional development and ways to inform themselves of the latest research. This volume will help education practitioners keep abreast of the most important recent research. As college student populations and environments continually change, so must the practices of the professionals who work with them. This volume highlights some of the most recent practices and perspectives in ethics and cultural competence for all college and university personnel. This volume is unique and valuable because other books have addressed culturally competent ethical practices for discrete professions within higher education, no single work has a collection of writings about ethical and culturally competent practices for a variety of the professions in higher education.

Strategic Pragmatism Edgar H. Schein 1996-06-17 foreword by Lester Thurow Per capita income in Singapore has gone from \$500 to more than \$20,000 in a little over twenty-five years. Edgar Schein, a social psychologist with a long and celebrated research interest in organizational studies, examines the cultural history of the key institution that spawned this economic miracle. Through interviews and full access to Singapore's Economic Development Board (EDB), Schein shows how economic development was successfully promoted. He delves into the individual relationships and the overall structure that contributed to the EDB's effectiveness in propelling Singapore, one of Asia's "little dragons" into the modern era. In his foreword, Lester Thurow locates Schein's organizational and case-specific account within a larger economic and comparative framework. Over a period of two years, Schein studied how the EDB was created, the kind of leadership it provided, the management structure it used, the human resource policies it pursued, and how it influenced other organizations within the Singapore government. Schein sat in on EDB meetings and extensively interviewed current and former members of the board, Singapore's leaders who created the board, and businesspeople who have dealt with the board. His book intertwines the perspective of the board's members and its investor clients in an analysis that uses both organization and cross-cultural theory. Although there are currently studies of comparable Japanese and Korean organizations, this is the first detailed analysis of the internal structure and functioning of the economic development body of Singapore, a key

player in the Asian and world markets. *Management Fundamentals* Steven Cohen 2020-06-23 Skillful management is essential to the functioning of any organization. Back on track! Successful management techniques to get a company out of debt pile

Olga Bieck 2014-02-01 The present work is analysing the successful turnaround of the Japanese car manufacturer Nissan in 1999 to 2001. Very often transformational change fails due to different factors, in most cases though

due to the insufficient employee's motivation or due to cultural problems when two international partners try to gain the competitive advantage through merger or alliance. To analyse the successful turnaround of Nissan after its alliance with Renault, a 'new' model for conducting organizational change was introduced. The provided framework unites both actions and attitudes, necessary for motivating employees and establishing new structural and cultural patterns. The example of Nissan proved that clear analysis of the present situation, cross-border communication during the whole transformational process, the sense of urgency established from the very beginning and total commitment of top management and employees are the vital factors that define the success of transformational intention.

Real Birds in Imagined Gardens Kavita Singh 2017-03-07 Accounts of paintings produced during the Mughal dynasty (1526–1857) tend to trace a linear, “evolutionary” path and assert that, as European Renaissance prints reached and influenced Mughal artists, these artists abandoned a Persianate style in favor of a European one. Kavita Singh counters these accounts by demonstrating that Mughal painting did not follow a single arc of stylistic evolution. Instead, during the reigns of the emperors Akbar and Jahangir, Mughal painting underwent repeated cycles of adoption, rejection, and revival of both Persian and European styles. Singh’s subtle and original analysis suggests that the adoption and rejection of these styles was motivated as much by aesthetic interest as by court politics. She contends that Mughal painters were purposely selective in their use of European elements. Stylistic influences from Europe informed some aspects of the paintings, including the depiction of clothing and faces, but the symbolism, allusive practices, and overall composition remained inspired by Persian poetic and painterly conventions. Closely examining magnificent paintings from the period, Singh unravels this entangled history of politics and style and proposes new ways to understand the significance of naturalism and stylization in Mughal art.

Who Wants Democracy? Javeed Alam 2004 From the moment of its birth democracy in India was plagued by a deep anxiety. In 1947, Nehru saw the future as a time to redeem pledges, a time to fulfil the hopes that had been aroused during the national struggle. But he was well aware that this was a difficult task. Reforms followed, democratic institutions were set up, and universal adult franchise was established. But poverty, illiteracy and poor health remained part of the post-colonial landscape. Why then do the poor and the malnourished return in every election to choose their representatives, to form the government of their choice? Through an effort to answer this seeming paradox, Alam explores the working of democracy in India, beneath the play of caste and communal politics, and the threats of institutional collapse, Alam sees democracy acquiring a firm basis within Indian society. He shows what the voting patterns tell us about the links between regional

voices and national unity, between the politics of community and the idea of citizenship, between the commitments of the poor and the apathy of the rich. This is a tract that questions our common assumptions and forces us to re-think our ideas about the life of Indian democracy.

The Financial Ecosystem Satyajit Bose 2019-10-16 Long term asset owners and managers, while seeking high risk-adjusted returns and efficiently allocating scarce financial capital to the highest value economic activities, have the essential and formidable role of ensuring the sustainability of return. But generally accepted financial accounting methods are ill-equipped to provide clear signals of the risks and opportunities created by scarce natural and human capital. Hence many investment managers in global financial markets, while performing due diligence on portfolio companies, examine metrics of non-financial performance, especially environmental, social and governance (ESG) indicators. Broken into three sections, this book outlines the rationale for and methods used in six areas where financial acumen has been harnessed to the goal of combining monetary return with long run sustainability. The first section offers an introduction to the role of finance in achieving sustainability, and includes an overview of the six areas—sustainable investing, impact investing, decentralized finance, conservation finance, and cleantech finance. The methods section of the book illustrates analytical tools and specialized data sources essential to those interested in increasing the level of social responsibility embedded in economic activity. The applications section describes and differentiates each of the six areas and their roles in advancing specific measures of sustainability.

Organizational partnerships for food policy research impact Mabiso, Athur 2013-12-12 Recently discourse has grown about the importance of partnerships for adding value to agriculture research, strengthening policy

capacities, and enhancing food policy impact on global food security and poverty reduction. However, the literature on partnerships specifically focusing on food policy research impact is still mostly emerging. This paper contributes to our understanding of food policy—research partnerships and provides a review of the theory and empirical literature about the factors that contribute to effective food policy—research partnerships. The literature points to the emergence of organizational partnerships as primarily driven by subjective perceptions about potential partners, the complex and uncertain external environment, access to resources through partnership and expectations of potential impact of the partnership. Perceptions that are found to be important include trust, mutuality of partner goals, legitimacy of partner and the perception that partnering will achieve more than what one organization can accomplish independently through cost sharing, lower transactions costs and increased competitiveness. Effectively implementing each phase of the partnership cycle, from scoping to reviewing and revising, with effective communication throughout all phases, is critical to achieve high quality and impactful food policy—research partnerships.

to ensure universal access to education. *Schooling for Social Change* provides a wealth of analysis from the frontlines of education reform and will be of interest to all those working in international and comparative education, human rights, and South Asian development. *Witnesses to History* Lyndel V.
