The Challenge of Teaching Gretchen Geng 2016-10-11 This book presents thirty-one accounts by final-year pre-service teachers, providing guidance and insights for less advanced teacher education students, and illustrating the use of life history and narrative stories as methods for pre-service teachers to explore educational issues in classroom practice. This life-history approach identifies those political, economic, and social forces that have impinged on the individual at different points in their life and contributed to the process of changing their identities. These stories are not written by established specialists in the areas they deal with, but instead by novice teachers at the beginning of their paths towards mastering the intricacies of teaching and learning in school settings. As such the book provides a mentoring framework and a means of helping pre-service teachers share their valuable experiences and insights into aspects such as how to manage practicum requirements. It helps establish a supportive relationship among pre-service teachers, providing them with access to valuable peer experiences. In addition it helps pre-service teachers make sense of their own practicum experiences and reflect on their own beliefs and professional judgement to develop their approaches and solve problems in their own classroom practice.

Essentials of Cross-Battery Assessment Dawn P. Flanagan 2013-03-06 The most up-to-date resource of comprehensive information for conducting cross-battery assessments The Cross-Battery assessment approach—also referred to as the XBA approach—is a time-efficient assessment method grounded solidly in contemporary theory and research. The XBA approach systematically integrates data across cognitive, achievement, and neuropsychological batteries, enabling practitioners to expand their traditional assessments to more comprehensively address referral concerns. This approach also includes guidelines for identification of specific learning disabilities and assessment of cognitive strengths and weaknesses in individuals from culturally and linguistically diverse backgrounds. Like all the volumes in the Essentials of Psychological Assessment series, Essentials of Cross-Battery Assessment, Third Edition is designed to help busy practitioners quickly acquire the knowledge and skills they need to make optimal use of psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you to gauge and reinforce your grasp of the information covered. Essentials of Cross-Battery Assessment, Third Edition is updated to include the latest editions of cognitive ability test batteries, such as the WISC-IV, WAIS-IV, and WJ III COG, and special purpose cognitive tests including the WMS-IV and TOMAL-II. This book now also covers many neuropsychological batteries such as the NEPSY-II and D-KEFS and provides extensive coverage of achievement batteries and special purpose tests, including the WIAT-III, KM-3, WRMT-3 and TOWL-4. In all, this book includes over 100 psychological batteries and 750 subtests, all of which are classified according to CHC (and many according to neuropsychological theory. This useful guide includes a timesaving CD-ROM, Essential Tools for Cross-Battery Assessment (XBA) Applications and Interpretation, which allows users to enter data and review results and interpretive statements that may be included in psychological reports. Note: CD-ROM/DVD and other

supplementary materials are not included as part of eBook file.
